TEAMWORK TOPPERS

"They Top the Tables!"

Table Learning Systems, Inc.

Interactive Table Systems For
Cooperative Classrooms

www.tablelearning.com

"Are your students achieving?"

"Do they retain information?"

"Do they work together?"

"Or are they *feeling left out*?"

"You need these tables!"

- Gain from each other's efforts
- Jointly celebrate.
- Each member recognized for achievement.
- Games, Fun, and More!

Successful teaching starts with each student being involved. Each team member at the table is responsible for learning what is taught, while helping others learn cooperatively.

This creates an atmosphere of achievement.

Promote academic achievement through collaborative teamwork.

Increase student retention by connecting content.

Enhance student satisfaction with differentiated instruction.

Solidify social interaction and inter-and intra-personal dynamics.

Develop problem-solving skills with oral communication.

The Dilemma

The classroom was stagnant; unable to adapt to neither educator's goals nor student's needs. Desks had become a physical barrier to cooperative learning in the classroom. The need for flexibility to transform the classroom from traditional desks in rows, to an atmosphere of working in teams and learning collaboratively had become evident.

The Solution

To promote cooperative learning while never losing sight of the individual student. This is accomplished through the use of Teamwork Toppers™ and Team Tubes™. These tools allow the classroom to become adaptable to meet the educator's goals and the student's needs.

The Story

During the summer of 2004, Gregg set out to create what would become Teamwork Toppers™. His backyard became his workshop, to build the prototype for the means to capture desks and engage students. That September his classroom was transformed; instead of traditional rows, students entered the classroom to find a bright colorful environment!

Photography: John D. Telfer

One of the things I will remember were the cool Table Tops!

We learned together!

I worked with others I would have never worked with before.

We actually had fun learning.

The Product Line

Teamwork Toppers™ capture desks and students, promoting "seamless team learning," while never losing the importance of each individual.

Teamwork Tubes™ facilitate students and teachers by presenting cooperative lessons in a unique way to inspire learning.

The Vision

Cooperative learning fosters leadership qualities which are fundamental in today's society. Teamwork Toppers™ combined with Teamwork Tubes™ provide educators with the tools to accomplish this objective.

The Founder

Gregg comes from an artistic background. He began his teaching career wanting to make a difference in the lives of students by empowering them to become lifelong learners through working with and learning from each other. Gregg believes there is no better way to change the world than through people. He promotes achievement by using these amazing tables and lessons everyday.
